### EXPERIENCE

- Frontend Developer | '24 – jan '26** MobilityPlus
  - Leading the frontend development of a data-intensive dashboard for fleet managers. Took ownership of the React and **TypeScript** codebase, working closely with backend and DevOps. Implemented **GraphQL** data flows using Apollo and managed global state with **Zustand**. Focused on delivering a seamless user experience, performance optimization and code maintainability.
- Frontend Developer | '22 – '24** Studio Hyperdrive
  - Developed and maintained multiple React applications for both public and government clients. Worked extensively with **TypeScript**, **SCSS**, and design systems, applying **BEM** and Atomic Design principles. Contributed to projects such as Het Archief (educational media platform) and HookUp (City of Antwerp), integrating existing component libraries. Actively participated in code reviews, improved code quality through testing, and helped shape frontend architecture decisions.
- Frontend Developer | '21 – '22** TVH Parts
  - Worked on a large-scale e-commerce platform as my first production **React** project. Focused on building reusable UI components, applying clean code and **DRY** principles, and gradually taking ownership of features. Collaborated closely with backend, design, and product to deliver user-facing improvements in a complex domain.

- Software Test Engineer | '18 – '21** TVH Parts
  - Quality assurance of internal software developed as part of the sales team.
